

Katy Lee

Alumni & Electives Officer

What will I do?

- As outlined in the role, I plan to organize an Elective Fair for fourth year students who are just about to start planning their Elective – hopefully even bigger and better than the one I’ve just done!!
- I also want to create an online map of elective placements and database of contacts to make it much easier for students to decide where to go on their elective and facilitate the planning.
- I want to work with Dr. Keerig and the university electives staff team to encourage more transparency of what we are expected to do on electives and enable earlier planning.
- I also want to maintain good relations and establish new connections with elective companies and providers – something I have already begun to do through my work organizing this year’s Elective Fair.
- For the alumni side of things, I’d like to start setting up a database of LMS alumni to provide closer long-term connections with the medical school.
- Finally, I’d like to facilitate the formation of sub-societies and sub-groups for the graduation ball/yearbook and an alumni event sub-committee to promote more student involvement in events and making them ultimately more successful!

Why me?

Having spent the last year as President of LMS Global Health Society and (almost!) single handedly planning and running Leicester Medical School’s first ever Elective Fair last week, I think I’m very well experienced and equipped for the role! I have a lot of interest in electives and I’d love to see more support being provided for final year students organizing and heading out on their electives. It’s a new role and I have a lot of ideas I could bring, so with my generally good organization, event planning experience as well as my creativity I think I’d do a pretty good job!
