

# VOTE PRABODHINEE FOR ACADEMIC!

## WHY VOTE FOR ME?

My previous role in college has given me the skills to be able to introduce and execute my ideas at a high standard to improve the peer learning approach LUSUMA has developed.

I want to focus on tailoring revision lectures to students with a wider scope of learning styles and therefore benefit students in a majority, rather than simply all “*traditional lectures*” which may not appeal to all.

I am willing to go out of my way to provide a more productive learning experience for all students by further enhancing work relations between peers. This would be accomplished through creating optional group work revision sessions on Phase 1 material where small groups of both years could choose to work together through questions to aid learning.

As academic officer I would make it my responsibility to improve student satisfaction in revision material provided as well as academic support offered by LUSUMA, this is vital as these are the pillars of academic success and I believe one of the best ways to improve the medical school experience is to reinforce these areas.

I am friendly, passionate and approachable. I would be dedicated to this role and open to any opinions the study body may have.

Ensure more revision sessions are tailored with a clinical and anatomical focus, with priority given to ESA- like question practice.

More optional pastoral support given to aid in formation of revision timetables, to help fit revision into extracurricular activities such as sports

Introduce supplementary sessions following clinical patient journey cases which integrate learning from different modules.

Launch recorded revisions sessions which are would be available to consolidate learning further.

Make practice SAQ and SBA questions and model answers available in a separate folder for each module on the website for easy access.

## WHAT WOULD I DO?
